## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-11 are allowed.

The following is an examiner's statement of reasons for allowance: The prior rejection of claims 1-11 under the judicially created doctrine of obviousness-type double patenting is withdrawn in view of applicant's filing of a terminal disclaimer in compliance with 37 CFR 1.321(c). The examiner does not agree with applicant's assertion that the claims are patentable even without the filing of the terminal disclaimer, nor does the examiner agree that the prior rejection was in any way improper. However, applicant's arguments are rendered moot by the filing of the terminal disclaimer.

No other prior art has been found to disclose or suggest applicant's controller "being configured to set the information regarding the identification of the user, input by the panel section, into the mail message of the e-mail to which the image data is attached when the information regarding the identification of the user is input, whereby opening, at the receiving apparatus, of the attached image data is not required to determine the information regarding the identification of the user," as recited in base claims 1 and 8, or applicant's step of "setting the information regarding the identification of the user into the mail message of the e-mail to which the image data is attached when the information regarding the identification of the user is input, whereby opening, at the receiving apparatus, of the attached image data is not required to determine the information regarding the identification of the user," as recited in base claims 6 and 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
